

## VHS Master Release of Liability Form

During the playback process, the VCR/Cassette Recorder/Reel Digitization Machine being used to digitize them can eat tapes and/or reels. This is due solely to the age/quality of the tape or reel. VHS Master is not responsible for the loss/destruction of any tapes during the digitization process.

I \_\_\_\_\_ understand that there is a chance that tapes could be ruined in the process of digitization, playback or recording. This is solely due to the tape's age and not due to any fault of Scott Johnston, owner of VHSMaster.com. If damage occurs, during digitization, playback or recording, I will not take any civil or other legal action against VHSMaster.com/Scott Johnston.
